

SAFETY – Did you know

FORESPAR® MAKES:

- ◆ Crew overboard pole
- ◆ Automatic strobe water light
- ◆ Lightning protection device
- ◆ Flag tubes
- ◆ Overboard pole rail mounts
- ◆ Temporary emergency plug

We take safety on the water very seriously.

DID YOU KNOW . . .

If a person falls off a boat moving at only 3 knots, they will be 50 feet away in only 10 seconds! In waves, the person in the water will lose sight of the horseshoe buoy without an overboard pole. The person on the boat will lose sight of the victim in the water, due to waves, without an overboard pole.

Safety equipment on any boat going offshore should include U.S.C.G. approved devices, such as our OP-120 crew overboard pole and our WL-1 LED floating water light for night time emergencies. The overboard pole will allow visual reference for recovery in daytime. The water-light will automatically flash for night time recovery and aid the victim in the water.

Forespar® provides life-saving required crew overboard safety equipment that you need for your offshore passages. Contact your local marine hardware dealer or call us for a complete catalog.
